

## Hexavalent chromium, REACH regulation PMG Steel Industries Group solutions

Faced to the tightening of regulations concerning the use of hexavalent chromium baths in the hard chrome deposition operation, our company RCD has invested for several years in compliance with environmental standards and security controls.

PMG group also offers substitution processes through dry deposits performed by Ouest Coating and Wujiang Polimiroir.

RCD continues to use the so-called hexavalent chrome plating process for the aerospace and industrial sectors following the derogation granted until 2024, but now proposes a new electrolysis deposition process called "blue chrome" or "green chrome" and is investing heavily in this new chemistry to offer an alternative solution.

### EXHIBITIONS IN PICTURES

This year we participated in many exhibitions  
and our teams are pleased to welcome you

MAY 2019 - CHINAPLAS - China  
Plastic sector

JUNE 2019 - SIAE - Le Bourget  
Aeronautical sector

**K'2019**  
16 au 23 OCTOBER 2019  
Düsseldorf - Germany  
Booth n° 3C70-04  
[www.k-tradefair.fr](http://www.k-tradefair.fr)

### OUR NEXT EXHIBITION

### Member of GIFAS

We are now a member  
of the French aerospace industries  
association.

**Closure for maintenance  
of our plants POLIMIROIR  
and OUEST COATING  
from 5 to 18 August 2019.**

Permanence is ensured during the summer  
on the plant RCD, PMG MAINTENANCE  
and WUJIANG POLIMIROIR.
