The News letter

PMG SI (Polimiroir Group - Steel Innovation) letter of information - June 2016

Edito

The PMG Group, with its subsidiaries Polimiroir, Ouest Coating, Wujiang Polimiroir, RCD and France Essor, strengthens its commercial approach.

Our meeting focused on the implementation of an organizational chart by product family.

We are willing to join forces both in our production capacity, in research and development, as well as in obtaining common qualifications.

Our sales teams are able to inform you about our possibilities, but also to analyze and answer more specifically to your project.

The managers of each product family have the technical knowledge of our capabilities. This will allow a very professional consideration of your request.

This reinforcement will allow us to continue our recruitment policy of new sales staff.

Olivier PEIFFER
President and Chief Executive Officer

Sales teams of the PMG Group in symposium
